

AZRA.

Graphics & Web Designer

azradesigner50@gmail.com | github.com/Azra-designer | Portfolio: <https://azra-designer.github.io/portfolio-website/> | Mumbai, India | [● Open to Work](#)

PROFILE

Mathematics graduate and a **Graphic & Web Designer** with a rare combination of visual design and frontend development skills. Designed and coded **4 live projects** end-to-end — from Figma wireframes to deployed websites. Delivered **real client work** before first job. Award winner in Mathematics and Physics. Seeking first full-time role in web design, UI design, or graphic design.

SKILLS

Frontend: HTML5 · CSS3 · JavaScript (Vanilla) · Bootstrap · Responsive Design · DOM Manipulation · localStorage · GitHub Pages

Design: Adobe Illustrator · Adobe Photoshop · Figma · Logo Design · Brand Identity · Print Design · Mockups · Canva

Learning: React · Python · SQL

Soft Skills: Client Communication · Event Coordination · Detail-Oriented · Self-Directed · Fast Learner

PROJECTS

TaskFlow — SaaS Website & Complete Brand Identity [End-to-End]

Live · [github.io](#)

Stack: HTML · CSS · JavaScript · Illustrator · Photoshop · Figma

- ▶ **Built** a fully responsive 7-section SaaS marketing website — sticky nav, smooth scroll, hamburger menu, active link highlight on scroll.
- ▶ **Designed** complete brand identity: logo system (4 variations), business card (front + back), 3 marketing posters, and Figma design system.
- ▶ **Created** laptop & phone mockups and a 7-slide Figma case study — full design-to-code process documented.

ExpenseIQ — Personal Finance Tracker

Live · [github.io](#)

Stack: HTML · CSS · Vanilla JavaScript · localStorage API

- ▶ **Built** a financial dashboard — add, delete, and filter transactions with real-time balance calculation.
- ▶ **Implemented** data persistence across sessions using localStorage API — zero frameworks, pure DOM manipulation.

Lucky Garage — Brand Identity [Real Client]

Delivered & Approved

Tools: Adobe Illustrator · Print Design

- ▶ **Designed** logo, business card, and brand color system for a real auto repair business — concept to final delivery.
- ▶ **Delivered** print-ready PDF with bleed marks, trim lines, and CMYK-safe color profile — fully production ready.

Birthday Surprise — Interactive Web App

Live · [github.io](#)

Stack: HTML · CSS · JavaScript · Web Animations API · Formspree

- ▶ **Built** multi-step form with custom JS validation, real-time error handling, and shake animation on invalid input — no libraries.

- **Implemented** confetti reveal using Web Animations API and email capture via Formspree integration.

VOLUNTEERING

Event Committee Volunteer — College(Mathletes Event)

Mumbai

- **Designed** promotional posters for college events — handled full visual communication from concept to print-ready output.
- **Coordinated** team communication for event execution — scheduling, on-ground management, and stakeholder updates.
